

# We're a responsible business

A business that takes its responsibilities seriously and finds creative ways to engage with society is more likely to endure. We not only make decisions based on financial factors, but also the social and environmental consequences of our operations.

Our company is deeply committed to environmentally friendly practices and, we work hard to use our skills and assets to benefit the community around us. Secure is fully committed to lead the Net Zero efforts and build a sustainable future.

projects

Secure is an Indian multinational with operations in Australia, Bangladesh, India, Italy, Singapore, Sweden, Switzerland, UAE, and UK. We create solutions for revenue management, power quality and energy efficiency that enable users to save money, reduce energy consumption and facilitate comfortable living.

Secure has over three decades of experience providing customised products and services to our customers spread across 60+ countries.

# What we do

We focus on users of energy in homes and workplaces to help reduce energy waste. Our solutions help reduce the cost of energy delivered to users. Our expertise is spread over the entire energy stream, from the generation of electricity, gas and heat to their final consumption, adding value at every point.

We do a lot more than metering - billing and collection, pump efficiency (ESCO), heating and cooling controls, energy auditing, asset monitoring, older adults care solutions, and more.

# Where we operate

Our headquarter is at Udaipur, in India and we have our offices in Australia, Bangladesh, India, Italy, Singapore, Sweden, Switzerland, UAE, and UK.

We also have two manufacturing partnerships in Malaysia and Ghana, which have enabled us to contribute to the swiftly emerging and major markets of Africa and South East Asia.
